## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-18, drawn to a document generation system involving transaction information, classified in class 715, subclass 530.
  - II. Claims 19-45, drawn to generating a listing of documents to create a set of documents, classified in class 715, subclass 513.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination I, and II has separate utility based on the recent amendment to the claims by the Applicant that discloses subcombinations. The first subcombination of the amended claims now discloses a document generation system that includes multiple components that involves an assembly facility focusing more on the use of transaction information within the system. The second combination of the amended claims now discloses generating a set of documents focusing more on the process of a listing a set of documents being created first then used to create another set of documents based on the listing. While both

subcombinations contain similar limitations, the amended claims show a clearer picture of two inventions being involved within the claims. See MPEP § 806.05(d).

Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

In addition, because these inventions are independent or distinct for the reasons given above and the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

3. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.
